FUND OBJECTIVE

The Polaris Global Value UCITS Fund seeks capital appreciation by investing in value stocks worldwide. The Fund is diversified across country and market capitalization, and typically holds 65 to 100 stocks that meet Polaris' strict value criteria.

INVESTMENT STRATEGY

The Investment Manager uses proprietary investment technology combined with fundamental research to identify potential investments. Filters are applied as part of the investment approach, which attempts to identify a list of companies with the most undervalued streams of sustainable free cash flow worldwide. Polaris then conducts rigorous fundamental research on the companies identified in the screening process, selecting companies in which the Fund invests.

INVESTMENT MANAGER

Polaris Capital Management, LLC is a global value equity manager that provides investment services for institutional and individual clients. Polaris' view is that worldwide markets are generally efficient over time, but investor behavior creates volatility that leads to inefficiency somewhere in the world. Polaris believes that investing in the most undervalued companies worldwide likely limits risk and has the potential to outperform the benchmark.

PERFORMANCE % AS OF 31 MARCH 2024

PERFORMANCE COMMENTARY

For the month of March, the Polaris Global Value UCITS Fund gained 4.18% (Class I), outperforming the MSCI World and ACWI Indices that returned 3.27% and 3.20% respectively. Outperformance was due to strong contributions from financials, energy, materials and IT, modestly offset by underwhelming results within communication services, health care and real estate. Regional gainers included United States, Germany, Canada, Ireland and Singapore, while China, France and Sweden detracted.

U.S. energy holdings, Marathon Petroleum, Williams Cos., Inc. and NOV Inc. had notable performance on the back of slowing inflation and stabilized crude oil and natural gas prices. Utility NextEra Energy returned to favor this month, after complaints about the Federal Election Campaign Act violations were dismissed. Another U.S.-based standout was footwear manufacturer, Crocs, Inc.; the market sees significant upside to Crocs' story as margins improve and international expansion continues.

Financials contributed most to performance, due partially to a large overweight position. Leading the charge were U.S. based International Bancshares, Northern Trust, JPMorgan Chase and Capital One Financial. Lundin Mining boosted the materials sector; the Canadian miner capitalized on higher copper prices. Among industrials, Daimler Truck was up more than 20% after an investor day showcased North American market growth. Fellow industrials, Allison Transmission Holding and Marubeni Corp., also contributed measurably. South Korean IT companies, SK Hynix and Samsung Electronics, both posted double-digit gains as they raced to use the same chip-making technology to meet artificial intelligence (AI) demand.

Among the detractors was Takeda Pharmaceuticals; the stock price dropped when the company withdrew its drug application for a specific form of lymphoma. Teleperformance declined on renewed concerns that AI will disrupt the French call center's business. SKF AB, the Swedish ball bearings manufacturer, reported significant volume decreases with little flexibility in pricing. Kia Corp. was down on profit taking, following a recent rally. Science Applications International declined after management announced significant restructuring, which put near-term pressure on margins. During the month, LG Uplus was sold on concerns about future expansion limitations and higher costs. There were no new purchases.

IMPORTANT INFORMATION

RISKS

Potential investors should be aware that an investment in a Fund may be exposed to other risks of an exceptional nature from time to time. Investment in the ICAV carries with it a degree of risk. There can be no assurance that a Fund will achieve its investment objective and there is potential for an investor to lose some or all of its investment in a Fund. Different risks may apply to different Funds and/or classes. Prospective investors should review the Prospectus carefully in its entirety and consult with their professional advisors before making an application for Shares.

The Fund is subject to the following risks, without limitation:

Equity Security Risk: the value of a company's equity securities is subject to changes in the company's financial condition and overall market and economic conditions.

FDI and Leverage Risk: FDI may fluctuate in value rapidly and leverage through FDI may cause losses that are greater than the original amount paid for the relevant FDI.

Emerging Markets Risk: emerging market securities may expose the Fund to more social, political, regulatory or currency risks than developed market securities and may be subject to heightened Liquidity Risk.

MLP Risk: MLPs expose the Fund to risks associated with the underlying assets of the MLPs and risks associated with pooled investment vehicles. There is also a risk that an MLP may not be treated as a partnership for U.S. federal income tax purposes, and the purpose of the Fund's investment in MLPs depends largely upon this.

Liquidity Risk: there may be insufficient buyers or sellers to allow the Fund to buy or sell certain types of securities readily, which may impact the Fund's performance or (in extreme circumstances) an investor's ability to redeem.

Counterparty Risk: a party with whom the Fund contracts for securities may fail to meet its obligations (e.g. fail to settle an FDI) or become bankrupt, which may expose the Fund to a financial loss.

Currency Risk: changes in exchange rates may reduce or increase the value of non-U.S. Dollar denominated assets held by the Fund. There can be no guarantee that currency hedging will be successful in mitigating such effects.

Operational Risk: material losses to the Fund may arise as a result of human error, system and/or process failures, inadequate procedures or controls.

For more information on these and other applicable risks see the sections "Investment Risks and Special Considerations" and "Investment Risks Applicable to each Fund" in the Prospectus.

DISCLOSURES

The Fund invests in securities of foreign issuers, including issuers located in countries with emerging capital markets. Investments in such securities entail certain risks not associated with investments in domestic securities, such as volatility of currency exchange rates, and in some cases, political and economic instability and relatively illiquid markets. Options trading involves risk and is not suitable for all investors.

Before investing you should carefully consider the Fund's investment objectives, risks, charges and expenses. This and other information is in the Prospectus and KIID. Please read the Prospectus & KIID carefully before you invest. A Prospectus is available for PCM Global Funds ICAV (the ICAV) and Key Investor Information Documents (KIIDs) are available for each share class of the Fund. The ICAV's Prospectus can be obtained from pcmglobalfundsicav.com and is available in English. The KIIDs can be obtained from pcmglobalfundsicav.com and are available in one of the official languages of each of the EU Member States into which the Fund has been notified for marketing under the Directive 2009/65/EC (the UCITS Directive). In addition, a summary of investor rights is available from pcmglobalfundsicav.com. The summary is available in English. The Fund is currently notified for marketing into a number of EU Member States under the UCITS Directive. The ICAV can terminate such notifications for any share class and/or the Fund at any time using the process contained in Article 93a of the UCITS Directive.

The Fund is offered solely to non-U.S. investors under the terms and conditions of the Fund's current Prospectus. Performance data shown represents past performance and is no guarantee of future results. Investment return and principal value will fluctuate so shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than quoted.

The Fund is authorised in Ireland and regulated by the Central Bank of Ireland.

This is an advertising document. The state of the origin of the fund is Ireland. In Switzerland, this document may only be provided to qualified investors within the meaning of art. 10 para. 3 and 3ter CISA. In Switzerland, the representative is Acolin Fund Services AG, Leutschenbachstrasse 50, 8050 Zurich, Switzerland, whilst the paying agent is Banque Cantonale de Genève, 17 quai de l'Île, 1204 Geneva, Switzerland. The basic documents of the fund as well as the annual and, if applicable, semi-annual report may be obtained free of charge from the representative. Past performance is no indication of current or future performance. The performance data do not take account of the commissions and costs incurred on the issue and redemption of units. Please be aware that this document may include funds for which neither a representative nor a paying agent in Switzerland have been appointed. These funds cannot be offered in Switzerland to qualified investors as defined in art. 5 para 1 FinSA.
